Computer methods in applied mechanics and engineering

Author index of Volume 116

Abgrall, R., An essentially non-oscillatory reconstruction procedure on finite-element type meshes: application to compressible flows 95–101

Bar-Yoseph, P., see Zrahia, U. 135–146
Belhachmi, Z. and C. Bernardi, Resolution of fourth-order problems by the mortar element method 53– 58
Ben Belgacem, F. and Y. Maday, A spectral element methodology tuned to parallel implementations 59– 67
Ben Belgacem, F., Polynomial extensions of compatible polynomial traces in three dimensions 235–241
Benocci, C., see Pinelli, A. 201–210
Berghezan, D., see Levieux, F. 165–174
Bernardi, C., see Belhachmi, Z. 53– 58
Bertoluzza, S., Y. Maday and J.C. Ravel, A dynamically adaptive wavelet method for solving partial differential equations 293–299
Boukir, K., Y. Maday and B. Métivet, A high order characteristics method for the incompressible Navier–Stokes equations 211–218
Boyd, J.P., Sum-accelerated pseudospectral methods: finite differences and sech-weighted differences 1– 11
Bungartz, H., M. Griebel and U. Rüde, Extrapolation, combination, and sparse grid techniques for elliptic boundary value problems 243–252

Canuto, C., Stabilization of spectral methods by finite element bubble functions 13– 26
Croce, L.D., see Scapolla, T. 185–192

Deville, M.O., E.H. Mund and V. Van Kemenade, Preconditioned Chebyshev collocation methods and triangular finite elements 193–200
Deville, M.O., see Schneidesch, C.R. 87– 94
Deville, M., see Pinelli, A. 201–210
Dupret, F., see Levieux, F. 165–174

Eckhoff, K.S., On discontinuous solutions of hyperbolic equations 103–112

Fischer, P.F. and E.M. Rønquist, Spectral element methods for large scale parallel Navier–Stokes calculations 69– 76
Funaro, D., A fast solver for elliptic boundary-value problems in the square 253–255

Giannakouros, J.G., D. Sidilkover and G.E. Karniadakis, Spectral element–FCT method for the one- and two-dimensional compressible Euler equations 113–121
Gottlieb, D. and C.-W. Shu, Resolution properties of the Fourier method for discontinuous waves 27– 37
Griebel, M., see Bungartz, H. 243–252

Guermond, J.-L., High order numerical quadratures for layer potentials over curved domains in $\mathbb{R}^3$ 257–263

Jensen, S. and S. Zhang, The p and h–p versions of some finite element methods for Stokes' problem 147–155
Joly, P., Y. Maday and V. Perrier, Towards a method for solving partial differential equations by using wavelet packet bases 301–307

Karniadakis, G.E., see Giannakouros, J.G. 113–121
Křížek, M., Superconvergence phenomena in the finite element method 157–163

Lazaar, S., Pj. Ponenti, J. Liandrat and Ph. Tchamitchian, Wavelet algorithms for numerical resolution of partial differential equations 309–314
Levieux, F., D. Berghezan and F. Dupret, Analysis of the interface singularity of a two-fluid flow by h and h-p finite elements 165–174
Liandrat, J., see Lazaar, S. 309–314

Maday, Y., see Ben Belgacem, F. 59– 67
Maday, Y., see Joly, P. 301–307
Maday, Y., see Boukir, K. 211–218
Maday, Y., see Bertoluzza, S. 293–299
Mandel, J., An iterative solver for p-version finite elements in three dimensions 175–183
Mavriplis, C., Adaptive mesh strategies for the spectral element method 77– 86
Métivet, B., see Boukir, K. 211–218
Mund, E.H., see Deville, M.O. 193–200

Olsson, P., High order finite differences methods on non-smooth domains 265–272
Ould Kaber, S.M. and C. Rosier, Spectral methods for 2D Riemann problems 131–133
Ould Kaber, S.M., Filtering non-periodic functions 123–130

Pasquarelli, F. and A. Quarteroni, Effective spectral approximations of convection–diffusion equations 39– 51
Perrier, V., see Joly, P. 301–307
Pinelli, A., C. Benocci and M. Deville, A Chebyshev collocation algorithm for the solution of advection–diffusion equations 201–210
Ponenti, Pj., see Lazaar, S. 309–314

Quarteroni, A., see Pasquarelli, F. 39– 51

Ravel, J.C., see Bertoluzza, S. 293–299
Rønquist, E.M., see Fischer, P.F. 69– 76
Roos, H.-G., Higher order uniformly convergent methods for singular perturbation problems 273–280
Rosier, C., see Ould Kaber, S.M. 131–133
Rüde, U., see Bungartz, H. 243–252
